Art Unit: 2814

The amendment filed June 30, 2003 has been entered and made of record as paper no. 11.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3, 4, and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Disney (US-6,127,701, of record).

Disney discloses a semiconductor device comprising a first semiconductor layer (16) formed above a first region (12) of a supporting substrate (20) with a buried oxide layer (18) disposed therebetween and a second semiconductor layer (24 and 30) formed on a second region (10) of the supporting substrate. It would have been obvious to one of ordinary skill in the art that the interface between the support substrate (20) and the semiconductor layer (30) is at a position deeper than the buried oxide layer (18).

Claim 9 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Applicant's arguments with respect to claims 1, 3, 4, and 6 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP
